SECURITY ASSESSMENT REPORT

Cisco Networking Academy – Networking Basics

REPORT ID	AZ-EH-2026-001
VERSION	1.0
ASSESSMENT DATE	17/10/2026
REPORT DATE	22/10/2026
PREPARED BY	Ammar Alzaiem
CLASSIFICATION	Public

Overview

- Status: Completed
- Course: Networking Basics
- Credentials: Link to Certificate

Key Concepts Learned

Concept	Explanation	Cybersecurity Relevance
Network Fundamentals	How devices connect and communicate to share data and resources.	Understanding how systems communicate.
Network Devices	Switches connect devices in a LAN, routers connect networks, and access points provide Wi-Fi.	Identifying network infrastructure and potential security weaknesses.
IP Addressing	IP addresses identify devices on an IP network.	Identifying hosts during network reconnaissance.
Network Protocols	Rules that govern communication, such as TCP, UDP, HTTP, and DNS.	Understanding network traffic and investigating suspicious activity.
Network Configuration	Configuring IP addresses, gateways, and other network settings.	Troubleshooting connectivity and identifying misconfigurations.
Network Troubleshooting	Diagnosing connectivity problems using tools such as `ping` and `ipconfig`.	Verifying host reachability and investigating network issues.

This course provided foundational networking knowledge that supports my cybersecurity learning, particularly network reconnaissance, penetration testing, and troubleshooting.
